

Olive care soap - liquid -

Product information Article no. 424

22.08.2018

■ General

Olive care soap is a liquid household soap for the cleaning of oiled or waxed surfaces, as a cleaner for oil-contaminated paint brushes and rollers as well as for soaping wooden floors. It also maintains more sensitive surfaces such as marble floors and joints.

The base of this product is our Corfu Soap, a pure olive soap, made on the Greek island of Corfu. The soap is handmade using a process that has stood the test of time for more than 150 years – containing only olive oil, lye, water and sea salt from the local region. No added dyes, preservatives or fragrances.

■ Properties

- Liquid
- Made only from olive oil
- Vegan
- Dilutable with water
- Replenishing and nourishing effect
- Low foaming
- Free of dyes, fragrances and preservatives
- Free of additional synthetic surfactants

■ Composition

Water, olive oil, sodium hydroxide, sea salt

■ Application

Shake well before use.

Cleaning floors

Cleaning smooth floors of all kinds, in particular oily or waxy floors made from cork, wood and ceramic tiles, as well as lino.

Add 50 ml of Olive Care Soap to 8 litre of warm water. For heavier stains, the dosage can also be increased, e.g. 150 ml to 8 litres of water.

Cleaning brushes and paint rollers

Thoroughly wash oily brushes and rollers with undiluted Olive Care Soap.

Dried, oily tools can usually be cleaned by briefly boiling in the soap solution.

Soaping floors and tables

In some parts of Germany, it is customary to protect softwood floors and tables against dirt by simply "soaping" them. This preserves the bright character of the wood as far as possible. Over the years, a beautiful patina then usually develops.

Dilute 1 part of Olive Care Soap with 3 parts of warm water. Apply the **warm** soap solution to the untreated wood floor or table, working with a suitable brush, scrub and then leave to dry. Repeat if necessary until the

desired result is achieved or until the surface is coated with an extremely fine soap film. This process may need to be repeated from time to time, depending on wear and tear, in order to guarantee sufficient protection for the wood.

Warning: Wood containing tannin, such as oak, may become severely discoloured.

It is expressly recommended that you create test areas to assess the result before carrying out any large-scale work.

■ Container sizes

Article no. 424 1 l

For prices, please refer to the valid price list.

■ Storage

The soap can be stored for at least 3 years if kept in a cool and dry place. During prolonged storage, the ingredients separate. This has no influence on the product quality and can be remedied by simply shaking.

■ Disposing leftover product

Keep for later use due to virtually unlimited shelf life. Product remains can be disposed of with household waste.

■ Labelling

Not applicable, no hazardous materials.

■ EU VOC VALUE ACC. TO 2004/42/EC

VOC limit / Max. VOC content (cat. A/f): 130 g/l (2010),
Product contains max. 1 g/l VOC.

■ Warning

Please check for allergies to natural substances. The product typically does produce an odour due to the natural raw materials used. **Keep out of reach of children!**

The information above was determined based on our most recent experiences. Due to application methods and environmental influences, as well as the varying nature of the substrates, liability for the general validity of the individual recommendations is excluded. Users must test the product prior to application to ensure it is fit for the designated purpose (sample coating).
